Categories

Jesper Rønn-Jensen

Front-end web developer, usability specialist. Started working with web pages seriously since 1995 and professionally since 1997.

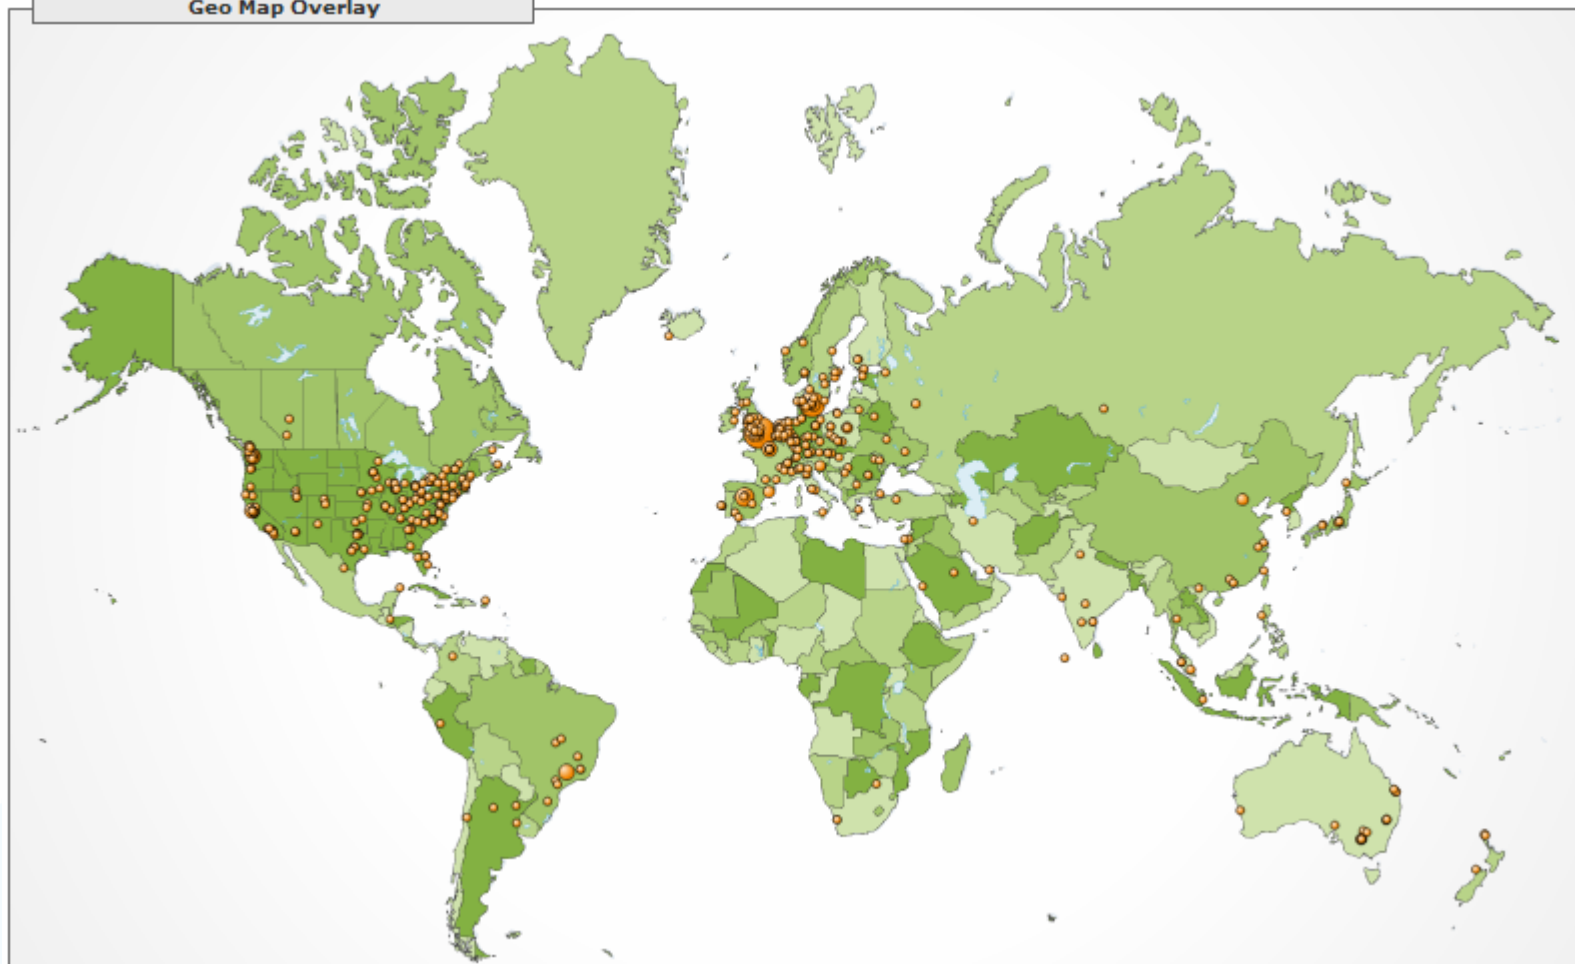

In Capgemini he acts as a usability evangelist and web-standards front-runner mostly working with prototypes, HTML, JavaScript and CSS or sketching wireframes for web applications on a nearby whiteboard (his most indispensable working tool).

Denmark Capgemini, Testify!

Jesper Rønn-Jensen preachin' to the choir about how they use Rails at CapGemini in Denmark as a high-fidelity rapid-prototyping tool.

That went on to some extent to the big client I spent time at last year. Our road map...

Using Google Analytics to find referring URL's

Jesper Rønn-Jensen of Capgemini Denmark who writes the JustAddwater blog wrote a very detailed, nicely illustrated blog entry entitled "Google Analytics trick: How to view referring URLs".

Google Analytics makes it easy to find the referring website by...

Cap Gemini lavede en funktionsdygtig prototype af en web-applikation i Ruby on Rails på 20 timer.

Normalt når man laver prototyper på web-projekter er det for at få...
